

PRO ANGLER SEAT BACK

Designed for fishermen by fishermen

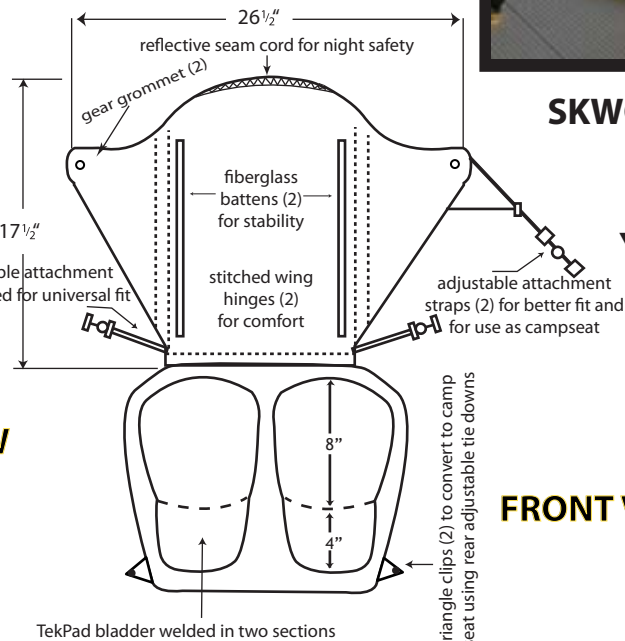

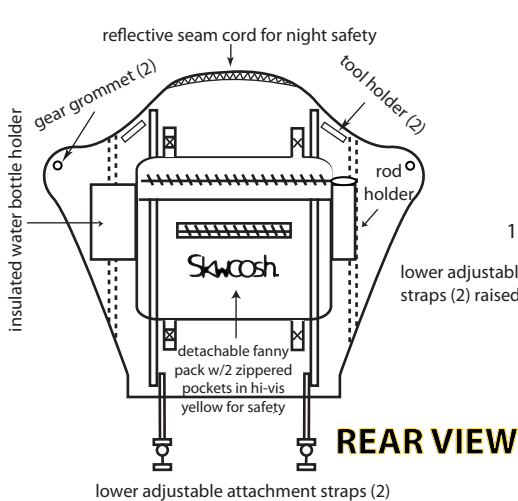

SKWOOSH™

PRO ANGLER combines the SKWOOSH™ GEL KAYAK SEAT with back support for COMFORTABLE FISHING.

The SKWOOSH seat is less than 1" high, maintaining a low center of gravity for better stability, maneuverability and safety while delivering more comfort than thicker, molded seats. The back is just the right height and shape for comfortable casting and easy access to a rear hatch. PRO ANGLER has a built-in rod holder, attached water bottle and a detachable fanny pack. It sports a hi-visibility color and a reflective cord for added safety. Grommets are conveniently located to attach or hang extra gear and two straps hold small tools within easy reach. On land it converts to a comfortable camp chair. PRO ANGLER is the ultimate in comfort, convenience and safety for the kayak fisherman.
